Contributors to this issue were H. Christine Collins, Elizabeth Hobbs, Bradley Karmen, and Susan A. Libbin. Principal coordinators were Patrick M. O'Brien, Thomas A. Warden and Thomasine B. McCall, World Analysis Branch, International Economics Division, Economics, Statistics, and Cooperatives Service, U.S. Department of Agriculture, Washington, D.C. 20250.

DIGEST

Agricultural Exports Up 30 Percent In October-June 1979/80 (see p. 4). Over \$31 billion in U.S. farm products were shipped to foreign markets during the first 9 months of fiscal year 1979/80. Volume of agricultural commodities rose about one-fourth to 123 million tons.

U.S. Agricultural Imports Reach \$13 Billion During First 9 Months Of Fiscal Year 1980 (see p. 64). U.S. agricultural imports totaled over \$13 billion during the first 9 months of fiscal year 1980, about 8 percent higher than last year. Value gains were recorded for most major products; the exceptions were cocoa beans, cocoa powder, rubber, hides and skins, meat, and fruits.

U.S. Exports Under Public Law 480 Rise In Value And Fall In Volume During Calendar Year 1979; AID Disbursements Decline (see p. 92). U.S. agricultural exports under P.L. 480 and AID totaled \$1,496 million in 1979, 5 percent less than last year as a value gain under P.L. 480 failed to offset a large decline in AID disbursements. Rising grain prices caused exports under P.L. 480 to total \$1,242 million, 10 percent higher than a year ago.

Selected Prices Of International Significance (see p. 102). Most farm product prices on international markets declined in June, including values of wheat, soybeans, soybean meal, coffee, cocoa beans, and rubber. Although U.S. gulf port wheat prices dropped during June, European quotations averaged higher. Price increases were limited to corn, rice, beef, and sugar.

Price Changes And Price Spreads Between Farm And Foreign Markets (see p. 106). Price spreads between U.S. farms and export locations increased for wheat and corn, but declined for soybeans during the 1978/79 marketing year.

AGRICULTURAL EXPORTS UP 30 PERCENT IN OCTOBER-JUNE 1979/80

U.S. farm product exports totaled a record \$31 billion during the first 3 quarters of fiscal year 1980, up 30 percent from last year's \$23.8 billion level. Value gains occurred primarily in grains and feeds, oilseed products, cotton, livestock products, fruits, and vegetables. Agricultural export volume rose about one-fourth to 123 million tons.

Currently, U.S. agricultural exports are expected to exceed \$38 billion in fiscal year 1980. Monthly shipments have recently declined from the record-high rates achieved in the first 2 quarters of fiscal year 1980. Post-strike activity at Great Lakes ports during October-December 1979 and heavy shipments to the U.S.S.R. contributed to an \$11 billion quarterly export rate in the first quarter. Momentum was maintained during the second quarter, despite a suspension imposed in January on shipments to the U.S.S.R. Total agricultural exports in March surged to nearly \$3.7 billion, approaching November 1979's historic high.

Although grain exports to the U.S.S.R. have fallen since the January 1980 trade suspension, shipments to other markets have picked up sharply. Wheat and coarse grain exports to Latin America, Africa, and Eastern Europe surged well ahead of 1978/79 levels, as import demand expanded in those areas. Since January, the U.S.S.R. has shifted its purchases to such non-U.S. sources as Argentina. Many countries which formerly bought grain from those sources are currently buying U.S. grain. Latin American countries--including Brazil, Mexico, Venezuela, Chile, and Colombia--have imported over 12 million tons of U.S. wheat and coarse grains this year, compared with 7 million tons during the same period in 1978/79. Asian and West European countries have also been importing substantially more U.S. coarse grains since January.

Grain exports for October-June 1979/80 totaled \$12.5 billion, 48 percent above the previously reported period. Coarse grain shipments were up more than 28 percent, and value jumped 50 percent as prices increased. Corn, the major coarse grain component, rose 22 percent in tonnage and 41 percent in value over year-earlier levels; export prices averaged \$125 per ton versus \$108 during the first 9 months of 1978/79. Grain sorghum shipments have already exceeded any previous full fiscal year's record, totaling 6.8 million tons in the 9-month period. Japan remained the leading market by a wide margin, followed by Mexico and Spain. Heavy shipments to Mexico reflect poor growing conditions in that country. Also, several countries which usually import Argentine sorghum have turned to U.S. supplies this year.

Wheat export volume thus far this year is up one-fifth over comparable months in 1978/79, reaching 25 million tons. Value surged 52 percent to \$4.4 billion, with export prices averaging \$176 per ton versus \$139 per ton a year earlier. Sources of the increased demand this year are mainly in Latin America, North Africa, Eastern Europe, and some Asian countries, including Korea, Bangladesh, the Philippines, Indonesia, Taiwan, Iraq, Lebanon, and Saudi Arabia.

Rice exports, in value terms, have already passed those of any previous full October-September period, except 1974/75 and 1977/78. Volume during October-June 1979/80 rose 16 percent above similar months a year earlier to 2.2 million tons, while value gained one-fourth to \$857 million. Korea, Iraq, Indonesia, and Nigeria are the principal rice markets this year, with additional purchases from the Dominican Republic, Brazil, Nicaragua, and several African countries.

Exports of oilseed products yielded \$7.9 billion in October-June 1979/80, a 13-percent gain over the same period in 1978/79. Soybean export tonnage rose 16 percent to nearly 20 million tons, while value moved up only 11 percent to \$5 billion because of lower prices. Western Europe, the People's Republic of China (PRC), and Indonesia are primary sources of foreign demand this year. Shipments of soybean meal were up more than one-fifth in both volume and value terms. Favorable price ratios between soymeal and alternative feed ingredients, and poor grain crops last year in many countries, boosted foreign demand for protein meals. Most of this year's U.S. soybean meal shipments went to European Community (EC) and East European countries.

Strong foreign demand this year led to the 70-percent value increase in U.S. cotton exports during October-June. Most of the additional cotton went to Asian countries. The PRC emerged as primary importer of U.S. cotton by a wide margin during 1979/80, followed by Japan, Korea, Taiwan, and Hong Kong. However, all took substantially more than they did in 1978/79. In October-June 1978/79, the PRC ranked as the third largest market behind Japan and Korea.

Asian countries took \$10.6 billion or over one-third of all U.S. agricultural exports in October-June 1979/80 versus \$8.9 billion or 37 percent the previous year. Japan remained the largest Asian market, taking \$4.3 billion, compared with \$3.8 billion last year. Farm product exports to the PRC jumped 85 percent to \$1.3 billion.

Agricultural shipments to Western Europe gained 29 percent to \$10 billion, with greater than average increases to such non-EC members as Spain, Portugal, Greece, Finland, and Norway. Exports to EC-9 members were up 26 percent, totaling \$7.5 billion.

East European countries took over 6 percent of all U.S. farm product exports versus 4 percent in October-June 1978/79. Shipments to these countries were 85 percent above levels of the previous year, with sharp gains to Poland, the German Democratic Republic, Czechoslovakia, Romania, and Yugoslavia. Agricultural exports to the U.S.S.R. during the 9-month period totaled \$1.4 billion. Most of these exports moved in the October-December quarter prior to January's export suspension. Remaining amounts of grain subject to the 5-year U.S.-U.S.S.R. agreement continued to move through March until the 8-million-ton level was reached.

Agricultural exports to Latin America and the Caribbean jumped 64 percent to nearly \$3.9 billion, with a doubling in wheat and coarse grain value. Volume expanded 78 percent to 12.6 million tons, including 5.2 million tons of wheat and 7.4 million tons of coarse grains. Wheat and coarse grains accounted for 50 percent of all agricultural exports to Latin America, compared with less than 40 percent in 1978/79.

Agriculture's trade surplus for the first 3 quarters continued large at \$17.7 billion, offsetting a substantial part of the \$40 billion deficit in nonagricultural products. The agricultural trade surplus in October-June 1979/80 was 54 percent larger than the previous year's \$11.5 billion level.

Monthly exports of farm products fell to just over \$3 billion in June, their lowest level since September 1979. An export surge occurred following settlement, in September, of the 82-day Duluth-Superior grainhandlers' strike, and averaged over \$3.5 billion per month between October 1979 and April 1980. Diminished values since April are attributable to lower prices for such major export commodities as corn, wheat, soybeans, and cattle hides.

Table 1--U.S. agricultural exports: Value by commodity, October-June 1978/79
and 1979/80, and June 1979 and 1980

1/ PRELIMINARY

U.S. AGRICULTURAL IMPORTS REACH \$13 BILLION DURING FIRST 9 MONTHS OF FISCAL YEAR 1980

U.S. agricultural imports totaled more than \$13 billion during the first 9 months of fiscal year 1980, about 8 percent higher than a year earlier. Values of most major imports rose; the exceptions were cocoa beans, cocoa powder, rubber, hides and skins, meat, and fruits.

Noncompetitive imports totaled \$5.8 billion during October-June 1979/80, 9 percent higher than the previously reported period in 1978/79. Green coffee registered the largest value gain, totaling \$3.3 billion or 23 percent higher than a year ago. However, the quantity of imported green coffee declined by 5 percent as import prices rose from \$1.33 per pound during the first 9 months of fiscal year 1979 to \$1.73 per pound in fiscal year 1980.

Principal coffee suppliers during the first 9 months of fiscal year 1980 included Colombia, 22 percent of the total; Brazil, 12 percent; Mexico, 8 percent; and Guatemala, 7 percent. Most major suppliers experienced volume declines, with the exception of Colombia, the Dominican Republic, Guatemala, and Uganda. Brazil registered the largest decline with 14 percent.

Crude rubber--the second leading noncompetitive import--declined 5 percent in value and much more in quantity as prices rose. Cocoa beans--the third leading noncompetitive import--declined sharply, 42 percent in value and one-third in volume as prices declined. Except for cocoa powder, rising prices caused other noncompetitive imports to increase in value.

Competitive imports totaled \$7.5 billion in the first 9 months of fiscal year 1980, nearly 7 percent higher than last year. Imports of meat and meat products declined 11 percent in value as both beef and pork imports dropped. Fresh and frozen beef and veal imports of \$1.2 billion declined less in value than volume as prices increased 9 percent. Pork imports rose in volume but declined in value as prices dropped.

Sharp price gains caused sugar imports, at over \$1 billion, to rise by two-thirds from a year earlier. The volume of imported sugar declined 8 percent even though the import duty for raw sugar was reduced to the statutory minimum because of tight supplies and higher prices. Based on estimated lower U.S. sugar use and higher production, the volume of sugar imports is expected to drop throughout 1980. However, rising prices should cause sharp value gains.

Principal sugar suppliers during the first 9 months of fiscal year 1980 were Brazil, 22 percent of the total; the Dominican Republic, 13 percent; the Philippines, 10 percent, South Africa, 4 percent; and Mauritius, 3 percent. Most major suppliers registered volume gains, with the exception of Brazil, the Dominican Republic, the Philippines, El Salvador, Peru, and Argentina. Particularly sharp volume increases occurred in imports from Australia, South Africa, Mauritius, Mozambique, Guatemala, Colombia, and Honduras.

Fruit and fruit preparation imports declined because of a 50-percent drop in concentrated orange juice. However, vegetable imports experienced a 15-percent gain.

Vegetable oil imports totaled \$463 million, slightly higher than a year ago. However, the quantity of vegetable oils imported declined because of sharp price gains.

Among other competitive imports, there were value gains in live animals, dairy and poultry products, tobacco, wine, and malt beverages. Hide and skin values declined in October-June 1979/80.

1/ PRELIMINARY

U.S. EXPORTS UNDER PUBLIC LAW 480 RISE IN VALUE AND FALL IN VOLUME DURING CALENDAR YEAR 1979; AID DISBURSEMENTS DECLINE

U.S. agricultural exports under Government-financed programs (Public Law 480 and AID) in calendar year 1979 totaled \$1,496 million, 5 percent less than last year as a value gain under P.L. 480 failed to offset a large decline in AID disbursements. Higher prices, chiefly for grains, caused exports under P.L. 480 to total \$1,242 million, 10 percent more than a year earlier. The quantity exported under P.L. 480 declined 4 percent.

U.S. commercial agricultural exports reached a record \$33.2 billion in 1979, about one-fifth higher than last year. Government program exports accounted for only 4 percent of all U.S. agricultural exports, about the same as 1973's share.

Egypt, the principal recipient of U.S. Government program exports in 1979, received 26 percent of the total. About the same value went to Egypt as in 1978, as a large increase in P.L. 480 Title I shipments offset a drop in disbursements under AID programs. The value of Government program exports declined to most other leading recipients, with the exception of India and Indonesia, where there were minimal gains, and Zaire, where P.L. 480 exports rose considerably.

Exports under P.L. 480 Title I (long-term dollar credit sales) totaled \$821 million in 1979, slightly more than the previous year. Rising prices caused the quantity shipped to fall by 5 percent. Title I exports went to nearly 30 countries, with Egypt and Indonesia taking about half the total value. Value exports to Egypt increased about 50 percent over last year. Shipments to Indonesia remained about the same. Nine non-North African countries were recipients of \$90 million worth of Title I exports in 1979, compared with \$40 million in 1977. Zaire and Sudan were the major recipients.

Wheat accounted for slightly over half of the value of Title I exports in 1979. Rising prices caused the value of wheat shipped to jump 25 percent while the quantity under Title I increased by only 4 percent. Most Title I wheat went to Egypt, Bangladesh, Indonesia, Pakistan, the Republic of Korea, Portugal, and Sudan. Rice, the second main commodity under Title I, declined much more in value than in volume because of falling prices. About two-thirds of the Title I rice went to Indonesia; most of the remainder went to Peru, Zaire, and Syria. Wheat flour, the third largest commodity under Title I, rose by over one-fifth in value, but declined in volume due to advancing prices. Egypt was the main recipient of flour. Value and volume exports of corn and soybean oil declined under Title I, while there was a small gain in cotton and tobacco. Soybean oil exports fell by two-thirds in value and slightly more in quantity. There were also small shipments under Title I of bulgur wheat, cottonseed oil, and protein fortified food products in 1979.

Rising prices pushed donations under P.L. 480 Title II to \$421 million in 1979, one-fourth higher than last year as the quantity exported declined slightly. Nearly two-thirds of all Title II donations went through voluntary relief agencies, one-fifth was distributed through the World Food Program, and the remainder was shipped on a Government-to-government basis. In value, soybean oil was the principal commodity donated in 1979, twice the level of a year ago. Other leading commodities included bulgur wheat, blended food products (corn-soya milk and wheat-flour-soya blend), wheat, wheat flour, rice, nonfat dry milk, and coarse grains. Higher prices caused the quantity of wheat donated to decline and the volume to increase less than the value of flour, bulgur wheat, and blended food products.

Disbursements under AID programs totaled \$254 million in 1979, two-fifths less than a year ago. The drop was partly due to a change in mid-1979 in the way Israel reports to AID its use of AID funds. Financial grants and loans are now extended to Israel for budget and balance-of-payments support. The funds may be used for purchase of any U.S. commodity, but no record is kept by AID (nor reported to AID) of the specific purchases made. The purchases will only be recorded by the Bureau of Census under total U.S. exports of the particular commodity to Israel. Officials believe that Israel will use some AID funds for purchases of U.S. agricultural commodities. However, as these purchases will not be recorded by AID, it will not be possible to determine specific amounts purchased with AID funds. Thus, the level of AID disbursements in 1979 and in future years may be undervalued, and the amount of commercial agricultural exports to Israel may be overvalued. Commercial exports are the difference between total agricultural exports reported by the Bureau of Census and exports under the various P.L. 480 and AID programs.

AID disbursements to Egypt declined greatly in 1979. However, there was no change in Egypt's reporting procedures, and AID still identifies commodities purchased with AID funds by Egypt. Small amounts were shipped under AID auspices to Ghana, Zambia, Bangladesh, and Jamaica in 1979. Principal commodities under AID were corn, soybeans, inedible tallow, and frozen chicken.

Table 21--U.S. agricultural exports under and outside specified Government-Financed programs and total agricultural exports: Value and percent of total, July-December 1954 and calendar years 1955 through 1979

SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

International prices for most farm commodities eased in June. Corn, rice, beef, and sugar prices continued their upward trend, while wheat, soybean, soybean meal, cotton, coffee, cocoa bean, and rubber prices declined. In June, only sugar, rice, cotton, and grain sorghums were priced higher than they were a year earlier.

The U.S. gulf ports price for wheat declined to \$4.32 a bushel in June, as new crop supplies came to market. Most of the U.S. wheat had been harvested before the drought in the Midwest. The 1980 U.S. wheat crop is now projected to be a record 2.32 billion bushels, but Canada and Australia have also experienced dry conditions and China has showed continued interest in buying wheat.

The U.S. gulf ports price for corn climbed to \$2.91 a bushel in June. However, the gulf ports soybean price declined to \$6.35 a bushel, \$1.74 lower than it was a year earlier. Weather conditions in the Midwest damaged many young corn and soybean plants. If farmers replant, they may choose soybeans because of the shorter growing season. The price for Argentine corn continues to be extremely high as a result of strong U.S.S.R. demand since the U.S. grain export suspension. The 1980 U.S. fall corn crop is forecast at 6.65 billion bushels, 14 percent below the record 1979 crop; and the late summer soybean crop is expected to be down from last year.

The Bangkok price for rice reached \$442 a ton in June, responding to the weather-related production downturn of the 1979/80 marketing year. While crop prospects point to a recovery in 1980, these crops have not yet been harvested. Thailand's carryover stocks are at their lowest level since 1973/74, as a consequence of heavy 1979 exports and a weather-reduced 1979 crop.

The Osaka price for U.S. cotton declined in June to 80 cents a pound. Fears that a recession would reduce demand, along with expectations for a good U.S. crop, dampened cotton prices. By early July, however, the outlook had changed to smaller production and use, with stocks remaining at relatively low levels. Now, even if production falls because of the hot, dry conditions in the Texas and Oklahoma producing areas, it would be offset by sluggish U.S. milling activity coupled with prospects for large crops abroad.

Among import commodities, beef prices turned upward in June after a 5-month decline. The diminishing number of cattle in feedlots, along with the decline in the number of hogs slaughtered, helped push imported beef prices up to \$1.14 a pound.

The New York spot price for coffee declined slightly to \$1.82 a pound in June. Large supplies of coffee in Latin America have weakened coffee prices in recent months, but the outlook for 1980/81 points to a decrease in world coffee production resulting from possible limitations of Brazil's yields because of the May 30-June 2 freezes.

The New York cocoa bean futures price tumbled to \$1.09 per pound in June, following 3 successive years of supply exceeding demand. Furthermore, in the last 4 months, cocoa bean prices dropped more than 30 cents a pound.

The New York spot price for raw sugar climbed to 32 cents a pound in June as severe sugarcane rust in Cuba caused world sugar production to decline 5 million tons from last year. Such producing countries as India, South Africa, and Thailand have also been hit hard by drought. Thailand suspended shipments at one point, unable to meet export commitments.

The New York spot price for crude rubber continued to decline, finally reaching 68 cents per pound in June.

PRICE CHANGES AND PRICE SPREADS BETWEEN FARM AND FOREIGN MARKETS

By

Bradley Karmen, Elizabeth Hobbs, and H. Christine Collins

In 1978/79, wheat, corn, and soybean prices all increased from a year earlier with wheat prices increasing the fastest. ^{1/} Price spreads between U.S. farms and U.S. exporters during the 1978/79 marketing year varied among the three commodities, increasing for wheat and corn, but declining for soybeans. The U.S. gulf ports to the Netherlands ocean freight rate for wheat rose 60 percent from last year, while U.S. gulf ports to Japan freight rates for wheat increased by 35 percent. These sharply increasing freight prices more than offset the widened price spreads that resulted from the devaluation of the dollar in relation to the guilder and yen.

Wheat

The weighted average price received by U.S. farmers for wheat rose 28 percent to \$109.49 per metric ton in 1978/79. U.S. export unit values of wheat to the Netherlands and Japan rose 13.7 percent and 21.5 percent, respectively. Implicit U.S. inland freight charges (shipping, storage charges, and other marketing costs incurred while transporting the wheat from the farm to an export position), as measured by the difference between the season-average price received by farmers and U.S. export unit values of all wheat shipped abroad, rose 20 percent.

Corn

The price received by U.S. farmers for corn increased only 3.5 percent in the 1978/79 marketing year, reaching \$82.28 a metric ton. The implicit U.S. inland freight charges rose to \$30.16 a ton, 22 percent over the previous year. The U.S. export unit value for corn exported to the Netherlands and Japan rose 10.8 percent and 9.3 percent, respectively. In the Netherlands, the import unit value for U.S. corn rose 17 percent in terms of the dollar; in Japan, it rose 7.5 percent.

Soybeans

The U.S. farm price for soybeans, at \$244 a ton, rose 13 percent from the last marketing year, after peaking at \$250 a ton in 1976/77. However, implicit storage and freight costs declined 17 percent from last year. The U.S. export unit value of soybeans exported to the Netherlands increased 9 percent over last year, and the U.S. export unit value of soybeans exported to Japan rose 12 percent. The Dutch and Japanese import unit values in dollar terms rose 6 and 9 percent, respectively.

Price Spreads

Price spreads between U.S. farms and U.S. exporters in the 1978/79 marketing year increased for wheat and corn, but declined for soybeans, compared with 1977/78. Implicit transportation and storage costs for wheat and corn increased about 20 percent over last year.

^{1/} The wheat marketing year is from June to May; corn, from October to September; and soybeans, from September to August.

Ocean freight rates for wheat rose 60 percent to the Netherlands and 35 percent to Japan but did not reach the high levels of 1973/74. Ocean freight rates for corn and soybeans reached new highs, and more than balanced the dollar price gains in the Dutch and Japanese markets that had resulted from depreciation of the dollar. Consequently, transportation costs exceeded the price spread between the U.S. export unit values and Japanese and Dutch import unit values for these commodities.

Effects of Dollar/Yen and Dollar/Guilder Exchange Rate Changes

Changes in dollar/guilder and dollar/yen monetary exchange rates have been advantageous to international grain traders, as the dollar value of these commodities increased while the commodities were in transit from the United States. The devaluation of the dollar relative to those currencies should have widened the spread between U.S. exporters and Japanese and Dutch importers. For both the Netherlands and Japan, the dollar prices of imported wheat, corn, and soybeans should have been boosted by currency alignments alone in 1978/79, as the dollar weakened again in relation to these two currencies.

Dollar/guilder exchange rates applicable to the wheat marketing year showed a 12-percent dollar depreciation for 1978/79; for corn, an 11-percent depreciation; and soybeans, a 10-percent depreciation. Likewise, the dollar/yen exchange rates applicable to the wheat marketing year showed a 19-percent decline; for corn, a 7-percent decline, and for soybeans, a 14-percent decline. In terms of Dutch guilders and Japanese yen, import unit values of all these commodities (except corn to Japan) declined.

Data in the following tables cannot capture totally the effect of dollar devaluation as forward contracting was occurring, and the actual data and terms of financial transactions associated with individual foreign sales cannot be determined. Nevertheless, the tables illustrate the timing of dollar devaluation effects on price spreads.

Table 26--U.S. wheat exports: Unit values and freight rates at various marketing levels to the Netherlands and Japan, marketing years 1974/75 to 1978/79

Economics, Statistics, and Cooperatives Service

The Economics, Statistics, and Cooperatives Service (ESCS) collects data and carries out research projects related to food and nutrition, cooperatives, natural resources, and rural development. The Economics unit of ESCS researches and analyzes production and marketing of major commodities; foreign agriculture and trade; economic use, conservation, and development of natural resources; rural population, employment, and housing trends, and economic adjustment problems; and performance of the agricultural industry. The ESCS Statistics unit collects data on crops, livestock, prices, and labor, and publishes official USDA State and national estimates through the Crop Reporting Board. The ESCS Cooperatives unit provides research and technical and educational assistance to help farmer cooperatives operate efficiently. Through its information program, ESCS provides objective and timely economic and statistical information for farmers, government policymakers, consumers, agribusiness firms, cooperatives, rural residents, and other interested citizens.
